

Please do not allow the city traffic and weather reports to be taken away from xm radio. As a professional truck driver it is very important that I know what is ahead of me when I am approaching a large city. It is important for my safety as well as others on the road. It is almost impossible to rely on local radio stations that only broadcast every 15 to 30 minutes only during rush hour for this information. Thank you for the opportunity to address this issue.
